

The Graying of HIV/AIDS: Community Resources for the Aging Network

Agenda

- The Graying of HIV: Implications for Community Programs
- Local Program Highlight: Promotion of HIV Testing, Education & Access to Care Through Community Collaboration
- Overview of HRSA's AIDS Education & Training Centers (AETCs)
- HIV Prevention & Services Locator
- AoA Older Adults & HIV/AIDS Toolkit
- Q & A

Your Aging Resource Center
Area Agency on Aging
PALM BEACH / TREASURE COAST, INC.

Presenters

- **Dr. Charles Emlet**, Professor of Social Work, University of Washington | Tacoma & affiliate faculty with the University of Washington Center for AIDS Research
- **Joan DeV Vaughn**, Healthy Aging Project Director, Area Agency on Aging of Palm Beach (PSA9, FL)
- **Diana Travieso Palow**, HIV Education Branch Chief, Division of Training and Technical Assistance, HIV/AIDS Bureau, HRSA
- **Aisha Moore**, Communications Director, AIDS.gov
- **Carol Crecy**, Director, Office of Outreach and Consumer Information, AoA

The Graying of HIV: Implications for Community Programs

Presented by
Charles A. Emlet, Ph.D., MSW
University of Washington | Tacoma

Growing Population of Older Adults Living with HIV Disease

- **Dramatic increase in those 50+ living with HIV disease in the United States**
 - Newly infected older adults
 - Long term survivors
 - HAART Effectiveness
- **Estimates are by 2015 50% of those with HIV disease in the U.S. will be 50+ (Justice, 2010)**

Estimated Number of Persons Living with HIV/AIDS Age 50+ in the U.S. 2004-2008¹

¹ CDC (2011) *HIV/AIDS Surveillance Report* V 21 Table 15b

*Table is showing an increase in HIV/AIDS among people 50+ from 2004 -2008.

HIV AAA Study in Washington State¹

- **Methods:**

- Survey of the 13 AAAs in Washington
- 36 item instrument administered on-line
 - Pilot tested with a AAA director and Case Management Supervisor outside WA
- Data collected over two months in 2008 with reminders sent by the W4A
- 100% response rate

¹Supported by the University of Washington Center for AIDS Research (NIH grant P30 AI027757).

Survey Results

Indicator	Percentage	
Serving Older Adults with HIV is consistent with agency mission	SA	33.3
	A	58.3
	SD	8.3
Currently interact with AIDS Service Organizations (ASO)	58.3	
Collaboration with ASOs needs improvement	60.0	
Experience working with people living with HIV 60+	Extensive	8.3
	Moderate	0.0
	Limited	66.6
	No experiences	25.0
Personnel Receives Training in HIV	63.6	
Agency Desires More Information on Aging and HIV	84.6	
More Information In The Form of:	Written Material	86.6
	Consultation	30.8
	Inservice Training	61.5

Discussion

- Majority of AAA believe serving older adult impacted by HIV is within mission
- Majority believe collaborations with AIDS Service Organizations needs strengthening
 - ASOs have less consistent coverage nationally
- More information and training is needed and wanted
- Toolkit provides needed information to providers

Promotion of HIV/AIDS Testing, Education, and Access to Care to Medically Underserved, High-Risk Seniors Through Community Collaboration

Presented by

Joan DeVaughn

Area Agency on Aging of Palm Beach/Treasure Coast
(PSA 9, FL)

Statistics

Palm Beach County, FL

- ❑ Nearly 28% of the population in PBC is 60+ (over 360,000 seniors)
- ❑ Heterosexual men/women 50 + are the fastest-growing demographic for new HIV infections
- ❑ South FL ranks the 3rd highest out of 50 states in cumulative reported HIV/AIDS cases
- ❑ 1 in 4 of county's new HIV cases is age 50+

Healthy Aging OAA Title III D Outreach Palm Beach County, FL

- **Focus on medically underserved, high-risk adults 60+**
- **Concentration at faith-based sites and low-income housing communities in underserved communities**
- **Collaboration with community health center which provides medical staff and HIV/AIDS counselor**
- **Activities include health screenings (blood pressure, blood glucose, hearing, and HIV/AIDS testing), disease information, health education, health counseling, promotion of evidence-based workshops, and health access referrals**

Older PLWHA: Care & Treatment

Presented by
Diana Travieso Palow, MPH, MS, RN,
HIV Education Branch Chief
AIDS Education and Training Centers (AETC)

"The Graying of HIV"

HRSA CARE ACTION, February 2009

<http://hab.hrsa.gov/newspublications/careactionnewsletter/february2009.pdf>

- Recognition by HRSA HAB: increasing prevalence of older PLWHA as an issue of growing concern
- What are best practices for caring for older PLWHA?
- Do different cohorts of older PLWHAs have different clinical needs?
- As the training arm for Ryan White grantee community, AETCs continue to provide education and training on this topic to target audience of clinicians

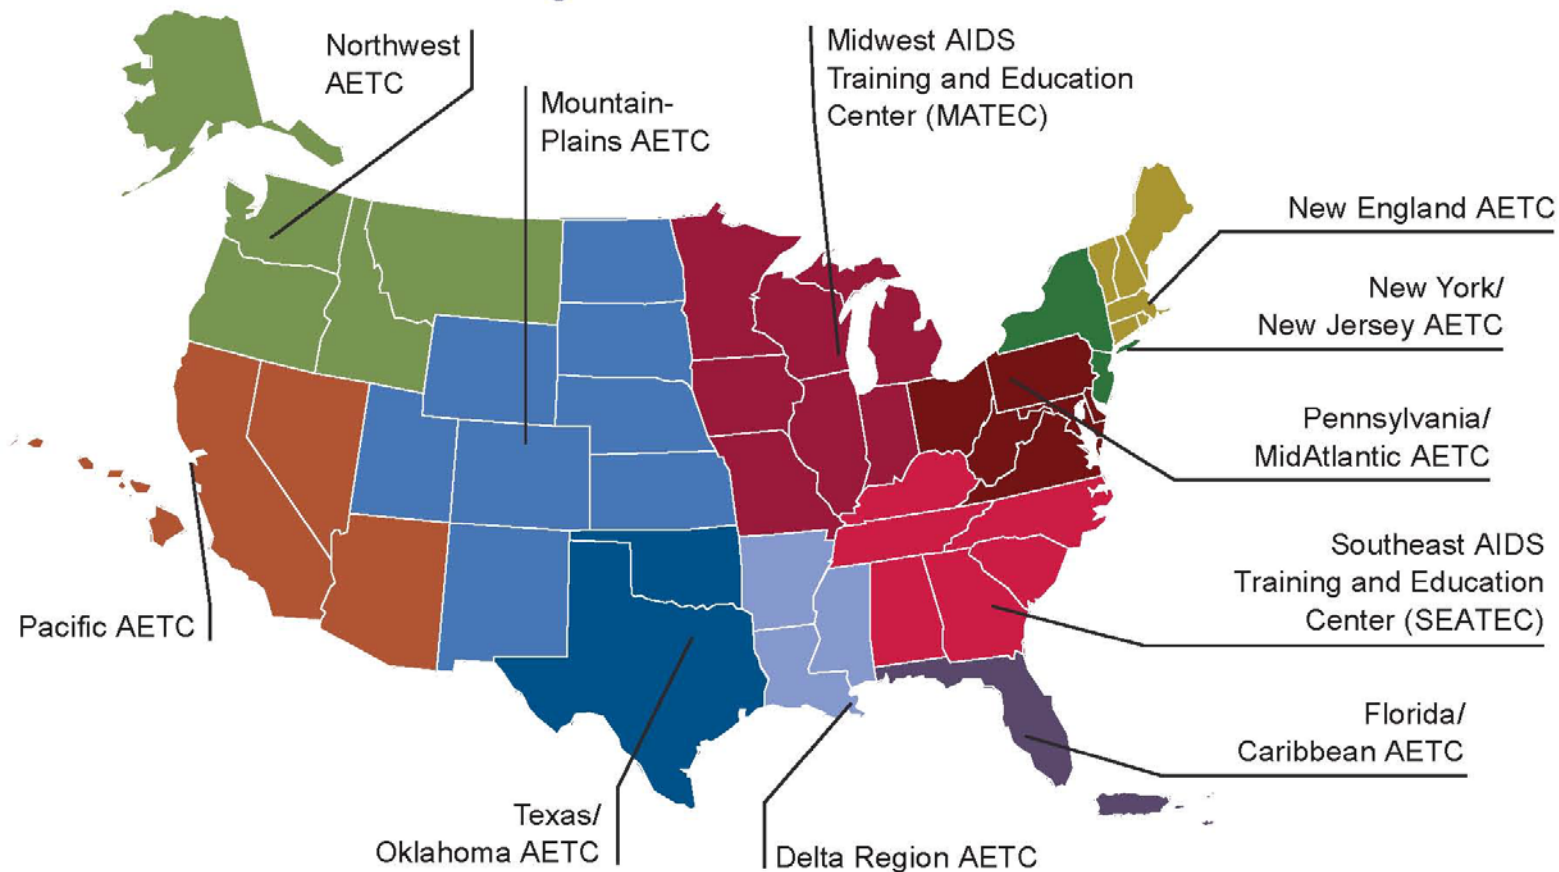

AETC Mission: Provide HIV Clinical Training for Providers

- AETC program is clinical training component of the Ryan White HIV/AIDS Program
- Program Goal: Increase number of educated and motivated providers to diagnose and treat people living with HIV
- From July 2009 – June 2010 **AETCs delivered 50,613 hours of training to 67,586 healthcare providers during 18,632 training events**

AIDS Education and Training Centers

- 11 regional centers with 130 local performance sites covering all 50 states and U.S. territories
- Focus on training clinicians:
 - Physicians
 - Nurses
 - Nurse practitioners
 - Physician assistants
 - Pharmacists
 - Oral health professionals
- 20% of training targets other members of health care team, e.g., case managers, social workers, mental health care workers, etc.

AETC Training Topics

Over 40 training topics routinely presented by AETCs (additional topics as requested or driven by changes in the HIV epidemic or HIV clinical management).

Types of Training

- Level I: Didactic
- Level II: Skills Building
- Level III: Clinical Training
- Level IV: Group Clinical Consultation
- Level V: Technical Assistance

AETC and TA Work of Note Re: Older PLWHA

- AETC National Resource Center
 - Multiple resources for trainers and clinicians
 - Curricula, slide sets, guidelines, etc
- New England AIDS Education and Training Center (NEAETC)
 - Annual well attended conference
- TARGET Center
 - Technical assistance for Ryan White Community
 - Archived presentations

AoA Older Adults and HIV/AIDS Toolkit

HIV: Know the RISKS. Get the FACTS.

Presented by
Carol Crecy

Director, Office of Outreach and Consumer Information
Administration on Aging

If You Think You're Too Old to Worry About HIV/AIDS, Think Again

- **In 2009, men & women 50+ accounted for:**
 - 17% of all diagnoses of HIV infection
 - 23% of all AIDS diagnoses
- Over 1 million Americans are living with HIV and the number is growing
- By 2015 half of the people living with HIV will be 50+

Fact Sheet & Customizable PowerPoint Template

HIV: Know the RISKS. Get the FACTS.

If you think you're too old to worry about HIV/AIDS, think again.

HIV risk doesn't stop at 50. In fact, men and women over age 50 account for 17 percent of all new HIV and AIDS diagnoses in the 40 states that have long-term confidential name-based reporting. Every 10 minutes someone in the United States is infected with HIV. Make sure it's not you.

Risk does not diminish with age.

You're at risk if you don't use a condom when having sex with a man or a woman who has HIV. Oral sex also carries a risk of infection. The risk can be especially high for women with age-related vaginal thinning and dryness that can lead to tears in the vaginal area.

Many older adults find it awkward to talk to a new partner about their sexual history and HIV, and most don't discuss sex with their doctors at all. That's a risk you don't have to take.

- Before having sex with a new partner, discuss your HIV status. You both have a right to know.
- Ask your health care provider for an HIV test if you are having unprotected sex or injecting

drugs. Medicare covers it. If you are a man who has had sex with other men, get tested at least once a year. If you are a woman, get tested whenever you have a new sex partner.

- Get tested before engaging in sex with a new partner, and be sure your partner has been tested for HIV too.
- Protect yourself. If you have multiple partners use a latex condom and lubricant every time you have sex. Avoid contact with another person's blood, and be sure to never share or reuse needles.
- Be alert to possible symptoms. HIV can go undetected in older people because the illness associated with it—such as weight loss, pneumonia, fatigue, confusion, and vision problems—also occur more frequently with age.

For more information about HIV and AIDS visit www.AIDS.gov or www.ACTAGAINSTAIDS.org. To find an HIV testing site near you, go to www.HIVTest.org or call 1-800-CDC-INFO

HIV: Know the RISKS.

HIV/AIDS and Older Americans

HIV risk does not diminish with age.

You are at risk if you don't use a condom when having sex—whether vaginal, oral, or anal—with a man or a woman who has HIV.

Age-related vaginal thinning and dryness can lead to tears that vaginal area to HIV infection.

Get the FACTS.

HIV/AIDS and Older Americans

PREVENTION

Get tested.

- Ask your health care provider for an HIV test as a routine part of medical care, if you are having unprotected sex, injecting drugs or have never been tested before. Medicare covers annual HIV testing.
- Get tested before having sex with a new partner, and be sure your partner has been tested for HIV too.
 - If you are a gay or bisexual man, get tested at least once a year. More frequent HIV testing – every 3 to 6 months – may be beneficial.
 - If you are a woman, get tested whenever you have a new sex partner.
- To find an HIV testing site near you, go to <http://www.HIVTest.org> or call 1-800-CDC-INFO
